

HAPPY FALL

Miss Chudzik's
Class
October 2009

Miss Chudzik's Classroom Newsletter

Learning Highlights

Math

We have been learning lots about place value and numbers. We are even challenging ourselves to read numbers in the hundred thousands place! Ask your child to show you how to express the number 456, 321 in three different ways!

Writing

We are working hard to add details into our writing. We will be using our five senses to describe things we see, touch, taste, hear and smell in fall!

Reading

Time is flying by! We are working hard at learning vocabulary skills such as author's purpose. We will continue to work on skills we've learned, but will be applying new skills such as finding the main idea and its supporting details in text.

Science

We have been studying all about weather. I hope you enjoyed making a weather instrument with your child. We are going to have a blast testing them out here at school!

Our Class

Tips for Helping Your Child

Practice skills we have worked on in the classroom at home. For example:

After your child reads, ask him or her to imagine he or she is a character from the story. When he or she has finished reading have your child write a journal entry from that character's point of view.

Upcoming Events

- September 28th - Fundraiser Due
