

April News

Mrs. Barboza's Kindergarten Class

Reminders

- Spring Vacation begins on April 19th.
- Please send in a healthy snack daily.
- Read and listen to your child read daily!

Spring Time Science

This month we will have fun while we learn about our life cycle, the life cycle of butterflies and of frogs. We will have a few new classroom pets to observe and enjoy too. Ask your child to tell you about our new little friends!

Reading

This month we will continue to practice reading. The children will continue to develop their reading skills by learning to play with words. They will blend sounds to make words and take words apart to count the sounds. They will also practice reading simple books orally and listen to stories about different types of transportation. The children will continue to work on new letter sounds and formation of their letters. This month they will also learn and practice the sound for the vowel "U".

Writing Fun

This month the children will write a story about their life cycle. They will practice writing complete sentences and using correct spacing and formation. Please send in a baby picture to use for this project (if you have not sent one already).

Amazing Math

The children will continue to practice addition this month. They will begin to learn subtraction too! They will also learn to count, write, and recognize the numbers from 11-20. Please help them practice these skills at home. The website dositey.com has a fun addition game that is great practice. Practice counting items at home and writing down how many of each. What can they find the most of in their room?
