

Grade Four May/ June Newsletter

We are so proud of our fourth grade for their diligent efforts on their Math MCAS Test. The test was taken over a 2 day period and covered all concepts taught since kindergarten. The level of questions and multi-step tasks require each student to carefully read and solve all parts of the questions. Each child worked to their highest potential...that's what really matters! 😊

Field Trip

We will be touring historical Plymouth and visiting the Jenney Grist Mill on Friday, June 11th. We will be learning many new historical facts as we adventure off on a walking tour, so dress accordingly. Don't forget the sunscreen. 😊 Parents/ Guardians are welcomed to chaperone. Please let us know by June 1st. The cost of an adult pass is \$11.00.

Our Social Studies exploration has sent us through the Midwest and on to the Southwest. The students were very interested in learning about the Great Depression and the Dust Bowl.

In Science we will be focusing on the properties of matter and conducting fun experiments.
